

University Park Direct Alarm Monitoring

Thank you for registering your alarm system for monitoring by the City of University Park. Please contact the Direct Alarm office if you have any questions 214-987-5372.

The below listed companies are participating with the University Park Police in performing the work necessary to connect your alarm system directly into the Police Monitoring Center. You may use any listed company, and the cost for the company to perform this service is between the home-business owner and the company.

To assist these companies, please have the brand name and model of you current equipment when you call. This can normally be found on the control board or inside cover of your alarm system. You may also see a brand name on the alarm keypad by a door.

* If your alarm is currently being monitored by 'Direct Alarm' you **do not** need to contact a company. If you would like to have your system checked or serviced please contact our office and we will refer you to the company who has worked on your system.

Alarm brand _____ Model _____
